

Open Letter to Senator Kennedy from Mass. Physicians

Dear Senator Kennedy:

We understand that you are working energetically on a comprehensive health care reform bill. We write as Massachusetts physicians and as your constituents who have experienced firsthand the consequences of our state's health care reform. We seek to alert you to the defects in the Massachusetts approach and to advise that you push, instead, for a single-payer reform.

At certain junctures in history, the obstacles of the past melt in the heat of a rising popular demand for change. Now is such a time.

You once proudly described yourself as “an old single-payer advocate,” and you have previously introduced model single-payer health reform legislation. We urge you to return to that vision now when your tremendous influence could make this truly just and practical plan a reality.

Please consider the simplicity, cost effectiveness and humanity of a single-payer plan, which could be implemented comparatively easily like traditional Medicare. Any plan that retains private insurers will add layers of bureaucracy and fail to control costs, dooming the noble effort to assure good care for all.

The Massachusetts reform is illustrative of these problems. Costs have skyrocketed –rising far faster than anticipated. Yet hundreds of thousands remain uninsured and the number of patients requiring free care has fallen by only a third. Surveys show that one of every seven Massachusetts residents still can't afford the care they need, and among patients directly affected by the new law, more say it has hurt than helped them. We fear that worse is just around the corner; money needed to fund the reform is being drained from safety-net providers who still carry a heavy burden of care for the uninsured and underinsured.

We ask that you introduce in the Senate legislation modeled on H.R. 676, which gained the support of 94 representatives in 110th Congress, and which has the backing of the U.S. Conference of Mayors, hundreds of unions, and thousands of physicians.

We urge you to be our Tommy Douglas – the founder of Canada's national health program, who according to surveys remains the most beloved of all Canadians. Surely we deserve the health benefits that are guaranteed in every other developed nation – all medically necessary care, and freedom from the fear of economic ruin due to illness. Only a move to single payer can cut bureaucratic waste, allowing an affordable expansion of care.

We must not squander the opportunity of this momentous time. With your experience and stature you are uniquely able to ensure that generations to come will enjoy the legacy of health care as a human right.
